

The solar panels customers installed in 2022 are the equivalent of taking nearly 3,400 cars off the road in terms of greenhouse gas emissions avoided. O& R wants to build on its success in helping customers complete solar projects by owning large-scale solar generation projects in New York State. The company would like state approval for ...

To accompany your solar solutions, we have a wide selection of solar regulators and accessories to complete your solar panel kits. REDARC's solar regulators will ensure that the power supplied by 24V and 12V solar panels is at the right voltage to charge auxiliary batteries efficiently.

DRS has vast experience with greenfield solar projects and brings expertise to each stage of development. Since 2016 DRS has successfully developed 75 operating projects totaling 300 MWdc enough power to serve 35,000 homes. DRS specializes in ...

The SREC-Based Financing Program provides an opportunity for you, or solar developers working in the Rockland Electric service territory, to bid SRECs into planned solicitations (RFP) prior to system connection. Solicitations are planned three times a year through 2017. Rockland Electric will solicit bids for contract terms up to 10 years.

It's important that you understand our energy grid before planning your solar project. In order to ensure reliability and safety, each project must submit detailed specifications for review. Depending on your project site, the size of the solar energy system relative to load, and the type of service to the building, your project may need ...

We're enabling 300 residential customers to get a cutting-edge solar & battery system at a discounted rate because these systems help lighten the load on the grid. We reviewed competitive bids and selected Sunrun as our partner in this project. This is the only solar & battery project currently being run by a utility in the state of New York.

Euler diagram showing the types of bodies orbiting the Sun. The following is a list of Solar System objects by orbit, ordered by increasing distance from the Sun. Most named objects in this list have a diameter of 500 km or more. The Sun, a spectral class G2V main-sequence star; The inner Solar System and the terrestrial planets. Mercury. Mercury-crossing minor planets

O& R customers continued their growing support for solar power in 2021. Approximately 29 megawatts of customer solar power were added to O& R's electric system in 2021 - the second largest annual increase of customer solar to O& R's electric system in the past 10 years. O& R customers have now completed more than 10,650 projects with the ...

2. Connect with your local community of solar supporters. Joining a community will connect you to solar homeowners and experts who may be familiar with your situation or solar company. Connect with us! You can book a 15 minute call with a Solar United Neighbors staff member. We have expert knowledge without an agenda (other than to help people ...

Important Regulatory Updates. Access the New Jersey Remote Net Metering Order for Public Entities (PDF). View the New Jersey Remote Net Metering Order (PDF). View Rockland Electric's Hosting Capacity Map for assistance with identifying potential sites for private generation.. Follow the guidelines below for the installation of distributed generation systems.

Increasing the use of solar energy - and the other technologies covered in the Clean Energy Update - is consistent with Con Edison's Clean Energy Commitment. About O& R. Orange and Rockland Utilities, Inc. (O& R) is a wholly owned subsidiary of Consolidated Edison, Inc., one of the nation's largest investor-owned energy companies. O& R is ...

Treatment of capital investment tax for large solar projects? There is a federal investment tax credit (ITC) of 30% for residential and commercial projects, MACRS accelerated depreciation for commercial projects, and other tax benefits such as the Property Tax Abatement in New York City, but the organization owning the system must have a tax liability in which to benefit from ...

Orange & Rockland (O& R) and Sunrun Inc. (Nasdaq: RUN), the nation's leading home solar, battery storage and energy services company, today announced the companies have received approval to deploy rooftop solar and battery systems as part of an innovative virtual power plant project supporting New York's transition to clean, reliable, locally generated ...
