

Smart Energy Management Platform constructed based on cloud-native Internet technology, our system integrates local controllers, BMS, PCS, thermal management, fire safety, and other subsystems. According to different application scenarios on the user side and source-grid side, we provide our customers with customized system solutions.

Chongqing-Quasar Energy (SG) Pte. Ltd., a subsidiary of Qingan Energy Storage Technology (Chongqing) Co., Ltd., recently made a strong debut at the Asia Clean Energy Summit (ACES) 2024 in Singapore, showcasing its innovative energy storage technologies.. As Singapore's premier event on clean energy, ACES has provided Quasar ...

The energy and power densities are considered as the most important factors for evaluating the energy storage ability of a device. The energy and power densities are regarded as the mixed results of specific capacitance and potential window. The Ragone plot with the relation between specific energy and specific power was shown in Fig. 7 (e) to ...
