

What is the future of energy storage?

Storage enables electricity systems to remain in balance despite variations in wind and solar availability, allowing for cost-effective deep decarbonization while maintaining reliability. The Future of Energy Storage report is an essential analysis of this key component in decarbonizing our energy infrastructure and combating climate change.

When is the last day of the Georgian energy and water supply Regulatory Commission?

The last day of the event on 28 October will be dedicated to the 25 th Anniversary of the Georgian National Energy and Water Supply Regulatory Commission, with a focus on the present and future outlook on regulation of the energy sector. ENERGO-PRO Group has been operating in Georgia since 2006 and today is represented by 5 companies:

Should energy storage be co-optimized?

Storage should be co-optimized with clean generation, transmission systems, and strategies to reward consumers for making their electricity use more flexible. Goals that aim for zero emissions are more complex and expensive than net-zero goals that use negative emissions technologies to achieve a reduction of 100%.

TBILISI, GEORGIA -The Economic Policy Research Center (EPRC) together with the McCain Institute at Arizona State University and the George W. Bush Institute will host the 8th Tbilisi International Conference on September 2-3, 2024 in Tbilisi. The conference, titled "2024: A Pivotal Year," will feature prominent policymakers and experts from Europe and the ...

International Conference on Energy Efficiency and Conservation in Buildings scheduled on October 03-04, 2024 at Tbilisi, Georgia is for the researchers, scientists, scholars, engineers, academic, scientific and university practitioners to present research activities that might want to attend events, meetings, seminars, congresses, workshops, summit, and symposiums.
