The Philadelphia Solar Rebate is an incentive program that encourages property owners to install solar photovoltaic systems in Philadelphia. This one-time incentive payment will be issued by the City after the solar project has been installed and has received Permission to ...

The Municipal Energy Office is working to decrease our greenhouse gas output. One of our goals outlined in the 2017 Municipal Energy Master Plan is to generate or buy 100% of all electricity from renewable resources by 2030. One strategy we're using to meet this goal is to buy Renewable Energy Certificates (RECs).

With the price of solar energy plummeting and the low-hanging fruit of energy efficiency, it makes a lot more sense to invest in creating a renewable energy hub for Philadelphia's future. -- Matt Walker is the community outreach director for Clean Air Council.

Based on modeled data using the National Renewable Energy Laboratory (NREL) ResStock(TM) tool, it is estimated that 90% of single-family residential homes ...

Philadelphia renewable energy

In Philadelphia, there is a growing interest in producing renewable energy. In 2019, city leaders passed Resolution 190728. This law sets a goal to transition the city to 100% renewable energy by 2050. It also included a mandate for Philadelphia to implement fully renewable electricity across the city by 2035 (if not sooner).

Four suburban Philadelphia counties are pursuing a renewable energy power purchasing agreement together in hopes of establishing a facility to power Chester, Delaware, Bucks, and Montgomery counties.
