How much do solar panels cost?

Some solar panels can run as high as \$600. The total number of solar panels you need will depend on your home's size and energy needs. Remember, solar panel prices do not include the cost of inverters, racking, and other necessary parts for a complete system installation. That's why it's financially wiser to get a complete solar kit.

Are solar panels sold separately?

\*Solar panels are not sold separately. Grid tie inverters convert solar DC power to home-friendly AC power and provide net metering capability. Batteries optimize cost savings by storing surplus energy when rates are lowest and utilizing it during peak demand times. They also serve as a reliable backup power source during outages.

Are solar home kits worth it?

Some things to consider regarding the usage of solar home kits include: Decrease in your energy bills - some consumers report from a 50% decrease to complete elimination of their energy bills when using solar home kits to offset their energy consumption. You get what you pay for.
