Your electric or hybrid car can also act as an additional battery storage. Sell your electricity: CEB Mauritius offers programs that allow you to feed excess solar energy back into the grid, earning you compensation for your contribution to the overall energy supply.

Finally, you will practice modelling the performance of a PV system for different solar energy applications, and estimating the energy production of a client's potential system. Learning Outcomes: Upon successful completion of this course, it is expected that students will:

Where the solar system has been installed and / or operated without the solar system being filled with water;  
Where the damage has been caused by an inflow of cold water into the system through the hot water pipe;  
Where the unit has been moved without the company's prior approval; No warranty on the vacuum tubes (except manufacturing defect)
