

Does Portugal need energy storage?

From ESS News Portugal is seeking to promote flexibility and balance its power system with energy storages as it continues to break records for solar energy production. To this end, the country's Ministry of Energy announced on Wednesday that it has allocated EUR99.75 million (\$107.6 million) in a bid to support 500 MW of energy storage projects.

What is Portugal's Energy and Climate Plan?

On 10 July 2020, the Portuguese Government approved the National Energy and Climate Plan through Council Ministers Resolution no. 53/2020. The plan will shape Portugal's energy and climate policy from 2021-2030 and sets the long-term objective of decarbonizing the economy by the end of 2050.

Should energy storage be democratised in Portugal?

Energy storage is therefore essential if EU targets are to be met. Portugal's installed energy storage capacity is still predominantly based on hydro pumping, which currently stands at 4,164 GW year. However, this paradigm is about to change with the democratisation of energy storage solutions through wind and solar production.

What is Portugal's energy import dependency?

In 2019, Portugal's energy import dependency was 74%, one of the highest levels among IEA member countries. Portugal has made progress on reducing energy import dependency by increasing the share of renewables in the energy supply, especially for electricity.

Does Portugal still need fossil fuels?

Portugal's climate and energy goals still face notable challenges, the IEA policy review notes, with an economy that remains heavily reliant on imported fossil fuels today. The report welcomes steps the government is taking to address these challenges.

How much does Portugal spend on energy RD&D?

Energy research, development and demonstration (RD&D) expenditure in the country reached 0.07% of GDP in 2019 (against 0.06% in 2016). The share of energy RD&D in total R&D expenditure evolved from 4% to 5% between 2016 and 2019. Portugal was among the first countries in the world to set 2050 carbon neutrality goals.

This process supports energy policy development and encourages the exchange of best practices and experiences to help drive secure and affordable energy transitions. Portugal's energy and climate policies push for carbon neutrality, primarily through broad electrification of energy demand and a rapid expansion of renewable electricity ...

Portugal s energy storage policy

The coal power plant in Pego, Abrantes, which stopped producing electricity in November 2021. Image: Endesa. Endesa Generaci#243;n Portugal, part of Enel Group, has been award the connection rights to develop a renewable energy project combining solar, wind, green hydrogen and a 168.6MW battery energy storage system (BESS) to replace the country's last ...

This article briefly analyses the Portuguese regulatory framework for utility-scale energy storage technologies, in order to highlight the strategies that have been followed. A ...

On 10 July 2020, the Portuguese Government approved the National Energy and Climate Plan through Council Ministers Resolution no. 53/2020. The plan will shape Portugal's energy and climate policy from 2021-2030 and sets the long-term objective of decarbonizing the economy by the end of 2050.

Portugal Renewable Energy Policy Handbook, 2023 Update . Data Insights ... In 2023, renewable sources such as dams and solar and wind parks provided 61% of Portugal's electricity, one of the highest ratios in Europe. The government anticipated collecting EUR125m (\$134.16m) from the CESE across the energy sector in its 2024 budget, mirroring ...

Enel Green Power announced on Thursday it has been awarded a 99-MW solar-plus-storage project in Portugal's latest auction. The renewables arm of Italian energy group Enel SpA (BIT:ENEL) estimates it will invest around EUR 90 million (USD 106.3m) to build what will be the group's first renewable-plus-storage project in the Iberian peninsula.

This Plan aims at establishing, by the Member States, goals and targets regarding greenhouse gas emissions, renewable energy, energy efficiency and electrical interconnections. As a decisive national energy and climate policy instrument, in the definition of strategic lines for the decade (2021-2030), towards carbon neutrality, in alignment with the visions and goals set out in the ...

The IEA regularly conducts peer reviews of the energy policies of its member countries. This process supports energy policy development and encourages the exchange of best practices and experiences to help drive secure and affordable energy transitions. Portugal's energy and climate policies push for carbon neutrality, primarily through broad electrification of energy demand ...

In the past few months Spain has announced a 2.5GW energy storage target by 2030 and Portugal is hosting a solar tender with a significant add-on option for storage. Clean Horizon's experts Corentin Baschet and Tanguy Poirot spoke with Andy Colthorpe on the role batteries and other storage can play in the Iberian Peninsula's energy transition in the present ...

Following the unprecedented crisis caused by the COVID-19 pandemic, Portugal's recovery and resilience plan has responded to the urgent need to foster a strong recovery, while making Portugal's economy and society more resilient and future ready response to the energy market disruption caused by Russia's invasion of Ukraine, the Commission launched the REPowerEU ...

Global energy storage platform provider Powin LLC and Galp, Portugal's leading integrated energy company, have partnered to install a utility-scale battery energy storage system (BESS) at one of Galp's solar power plants near Alcoutim, a small village in the country's sunny southern region of the Algarve, where Galp operates several projects with a combined ...

Table 22- Projections based on current policies and measures in gross final energy consumption in Portugal.....
125 Table 23- Projections based on current policies and measures of the contribution of renewable energies in each sector

The government said that competition has been launched in light of the the need to optimise and manage the electricity grid in Portugal in a more flexible way. Power generation capacity is around 22GW. Minister of Environment and Energy Maria da Graça Carvalho said: "This is a significant step towards Portugal's energy independence and towards building a ...

The lowest bid falls below the previous solar industry record tariff of US\$0.0135/kWh set by the Al Dhafra project in Abu Dhabi in April. It also comes in around 25% lower than the lowest bid in Portugal's first PV tender last year, which was EUR14.76/MWh and at the time itself a record.. Held on 24 and 25 August, the latest auction was for lots in Portugal's ...

The energy storage drive comes as the socialist government of prime minister António Costa works to deliver a boom of solar PV, whose contribution last year (1.5% of national power use) was far ...

Figure 2.8 Evolution of Portugal's final energy demand under the Roadmap for Carbon Neutrality 2050..... 28
Figure 3.1 Portugal's greenhouse gas emissions by sector, 2000-18 and 2030 target 42 Figure 3.2 Portugal's energy-related CO. 2

Vasco da Gama CoLAB is a Portuguese collaborative laboratory for the research and development of energy storage solutions. VG CoLAB develops innovative energy storage technologies through functional prototypes, focusing on battery cell scale-up, battery modules, and power electronics.

Portugal's electricity emergency response policy is based on the Decree Law No. 114/2001 on Energy Crises (DEC), which specifies that emergency response to an energy crisis requires plans and measures to optimise the use of available energy resources based on decision-making of the government.

The 5MW/20MWh system will help Galp to adapt its solar power production profile to its energy needs
PORTLAND, Ore.--(BUSINESS WIRE)-- Global energy storage platform provider Powin LLC and Galp, Portugal's leading integrated energy company, have partnered to install a utility-scale battery energy storage system (BESS) at one of Galp's solar ...

The current policies sought out for Portugal are also examined in order to identify which aspects should be

improved to promote and increase the relevance of DES in the Portuguese energy mix, and it is concluded that specific policies and support are needed to increase the relevance of decentralized electricity storage systems.

So companies, especially companies not yet present in Portugal, have a high willingness to pay for that access," he said. The auction was the first of its kind in Portugal that invited companies to lodge bids with a storage component included, with eight of the 12 batches awarded to solar-plus-storage projects.

The Portuguese Ministry of Energy has allocated EUR100 million for grid flexibility and energy storage projects to be completed by the end of 2025. This initiative aims to enhance the flexibility and stability of Portugal's power supply system amid its record-breaking solar electricity production. On July 31, the ministry announced the allocation of EUR99.75 million ...

Global energy storage market: H1 2024 installation figures Policy mandates in China have driven the global energy storage market in the first half of 2024 to new highs, backed by the rapid growth in the US market. Meanwhile, Europe posted mixed results. Robin Song, InfoLink Consulting's energy storage analyst, breaks down the figures.

In spite of foreseeing some innovative projects for energy storage in Portugal, there is not yet a general framework in this field. Nevertheless, Portugal has a sectorial legislative framework for the electric mobility network that describes the general framework of the network and the licences required to operate within it, this being Decree-Law no. 90/2014, of 11 June.

The Portuguese government has revealed preliminary results from the nation's second solar auction. It allocated 670 MW of solar capacity, instead of 700 MW, as initially planned, with the auction ...

Investments in grid infrastructure, energy storage solutions, and smart grid technologies will be essential to ensure reliable and stable energy supply. ... European Union Influence - Portugal's renewable energy policy is also influenced by broader EU targets and initiatives. This includes alignment with the EU's Green Deal and Fit for 55 ...

While there are regulatory issues to be resolved to support storage, Martins praised Portugal's solar auction strategy, which last year saw 12 batches awarded to solar-plus-storage projects and will result in at least 100MW of storage to be deployed by 2024. "The way in which the Portuguese government did the specifications of the auctions ...

This process supports energy policy development and encourages the exchange of best practices and experiences to help drive secure and affordable energy transitions. In this new report, the IEA will provide a range of energy policy recommendations to help Portugal smoothly manage the transition to an efficient and flexible carbon-neutral energy ...
