3. To enter Android Auto mode, touch Android Auto icon in the head unit screen. You can perform the operations of the Apps of the connected Android device. 4. In Android Auto model, touch "Home" or icon to the head unit main menu. Page 12 of 27

You should select it according to a power element of a backup camera. For example, we offer the 5, 6 and 7.5 V power converters. If a rear view camera (please note, not the image from a camera, but a reverse camera itself) is activated by shifting to the rear gear, you can connect it to reversing lights lamps.

Put the car in reverse, make sure the H/U is showing the backup screen, then check the camera's power (at the camera) to make sure it's getting 12V. You can also try connecting the camera to constant power instead of switched power temporarily. Some Pioneer head units run a video signal input check when they're first turned on.

Power Acoustik head unit not auto switching to backup camera

I have it hooked up to a Power Acoustik PD-718NB head unit. The unit has a "Reverse" wire in the back. This is for a backup camera. The camera I got came with a long ...

Out-of-the-box thinking, innovation in design and features are what sets Power Acoustik the head and shoulders above the rest. They offer superior larger capacity media storage devices, more ...

We fitted this 2006 Honda Civic with a Pioneer DMH-220EX and backup camera after the factory radio failed. As these cars are very popular, finding a used replacement radio is relatively easy but such a solution would leave more to be desired in terms of sound quality and connectivity. Not to mention that the unit could fail just like the pre-existing head unit. This 8th generation Civic ...

I installed everything but when I put my car in reverse the camera won't work, but if I manually turn it on in the radio, it works perfectly fine. I used t-tap connectors to connect all the wires and ...
