

Ppg development manager energy storage

What is ppg and how does it work?

PPG is helping vehicle, battery and component manufacturers accelerate the development of tomorrow's automotive energy storage solutions.

What is ppg fire protection?

PPG's fire protection coatings provide a shield to the battery substrate, helping to contain and minimize hazards.

What is ppg partnering with cellforce group?

PITTSBURGH-- (BUSINESS WIRE)-- PPG (NYSE:PPG) today announced that it has partnered with Cellforce Group, which is a joint venture between Porsche and CUSTOMCELLS, to develop exclusive sustainable battery cell solutions to better serve the electric vehicle and mobility segment.

Where is ppg headquartered?

With headquarters in Pittsburgh, we operate and innovate in more than 75 countries and reported net sales of \$13.8 billion in 2020. We serve customers in construction, consumer products, industrial and transportation markets and aftermarkets. To learn more, visit www.ppg.com.

Why do OEMs use PPG dielectric coatings?

Some OEMs, battery manufacturers and other customers use PPG dielectric coatings in place of film and/or tape solutions to eliminate gaps, bubbles, reduce seam failures, enhance edge protection, and to support high throughput and automated application.

What is intumescent fire protection technology PPG coating?

Intumescent fire protection technology PPG coating solutions can support and enhance all Battery Thermal Management System (BTMS) strategies. Common solutions and applications include gap filler/thermal conductivity coatings between battery plates and modules, and thermal conductivity coatings between cooling coils and plates.
