Pretty solar system

solar system costs listed as the cost per watt of solar installed so you can easily compare prices between quotes for different system sizes.

6 days ago· Our solar system is made up of a star--the Sun--eight planets, more than 140 moons, a bunch of comets, asteroids and space rocks, ice, and several dwarf planets, such as Pluto. Credits: NASA/Johns Hopkins University Applied Physics Laboratory/Carnegie Institution of Washington (Mercury), USGS Astrogeology Science Center (Venus, Mars), NASA's ...

A dry, hellish place, Venus is the hottest planet in the solar system, even hotter than Mercury. Sounds like a pretty good place to take a spa day, except for all the carbon dioxide in the atmosphere and the clouds made of sulfuric acid.

Every year, Hubble takes a little time to turn its electronic eyes closer to home. Rather than staring into vast distances across space and time, it focuses on our very own Solar System; specifically, the heavyweight planets that lurk out past the asteroid belt - Jupiter, Saturn, Uranus, and Neptune.
