

The abbreviation PV commonly refers to Photovoltaic, which is a technology that converts sunlight directly into electricity using solar cells. This term is frequently used in discussions about renewable energy and solar power systems.

What does PV stand for in solar? Photovoltaic (PV) stands for the conversion of light into electricity using semiconducting materials. This technology harnesses the photovoltaic effect to generate electrical power when sunlight interacts with the ...

You've probably heard of the abbreviation PV recently and wondered what it means. Well, PV stands for "Photovoltaic" (photo stands for light, whereas voltaic is the unit of electrical force), which is electricity from the sun's energy.
