The company's flagship product, Qatalyst, is the first software to bridge the power of classical and quantum computing, hiding complexity and empowering SMEs to solve ...

A catalyst does this by lowering the activation energy, which we explain in the next section. Catalysts work by providing an alternative pathway for the reaction to follow that has that lower activation energy, which makes it easier for the reactants to form the products. This allows the reaction to occur more quickly and efficiently.

He was the CEO of what is now known as Serengeti Energy, owned by KfW, Norfund, STOA and other Development Finance Institutions (DFIs). where he raised over \$100M in equity financing, built a portfolio of utility scale hydro, solar and wind projects of 42 MW in operations, 22 MW in construction and circa 640 MW in development across Sub Saharan ...
