

How do I connect my RAVPower filehub to my computer?

The RAVpower FileHub Travel Router fixes that. Open the door on the top edge of this accessory to expose the USB port. Plug in a thumbdrive or even a full USB hard drive. Alternatively, there's an SD card reader on the right side. Make sure you're connected to the FileHub over a Wi-Fi, then open the free RAVpower FileHub application.

What is a RAVPower filehub travel router?

"Very informative" -- Kenly Xavier. The RAVpower FileHub Travel Router is a battery, a wireless hub with a USB port and SD card reader for iPhone, and a travel router too.

How do I backup my sd card to a USB drive?

The highlight is the SD to USB backup function. Pressing the "SD & USB" button will automatically copy the entire contents of the SD card to the previously connected USB drive. That worked wonderfully in the test, although not particularly fast. The access times over the 2.4 GHz as well as the 5 GHz WiFi network were OK, but they didn't knock us out.

On the opposite side of the FileHub, there's a WiFi setting button, an SD card slot, and a one-touch backup button. On the top is a rubber cover protecting the three remaining ports: Ethernet, Micro-USB for charging the battery, and USB-A for connecting a storage device or a mobile device to charge.

Buy RAVPower FileHub, Home & Travel Router Dual Band AC750, Wireless SD Card Reader at Walmart ... A good device would support high-speed wireless transfers and USB3 (all are currently USB2) as well as an SD card slot. I've looked and looked and not found a good alternative to the FileHub. I think the issue has been the capability to put that technology in a small form factor package with low heat generation and high power efficiency.

The easiest way to "hack" / modify the configuration of the RAVPower Filehub is to create a script EnterRouterMode.sh on an SD card and put the card in the Filehub. The current firmware (2.000.004) will execute a script with this name when the Filehub starts.
