

The University of Kansas signed an agreement in 2018 to purchase nearly 100% of its electricity through Evergy's Renewables Direct program, which supported construction of the 300-megawatt Soldier Creek Wind Farm in Nemaha County. ... The program provides large customers a path toward their sustainability goals with renewable energy, while ...

Over the past decade, renewable power on the Kansas prairie typically meant one thing - wind turbines. But now, solar energy in Kansas is booming, with developers proposing utility-scale solar farms from Sedgwick County to Great Bend to Johnson County.. The city of Pratt operates its own electric utility.

Kansas is the eighth-largest ethanol-producing state, and its 12 ethanol plants have a combined production capacity of about 630 million gallons a year. In 2023, wind energy accounted for 46% of Kansas's electricity net generation, which was the third-highest share of wind power for any state after Iowa and South Dakota.

Kansas may not be the first state that comes to mind when you think "renewable energy powerhouse"--but it has become one. ... The Kansas City metropolitan area has also developed a Climate ...

HOUSTON - Today, bp's Archaea Energy (NYSE: BP) announced the official startup of its largest original Archaea Modular Design (AMD) renewable natural gas (RNG) plant to date in Shawnee, Kansas, just outside of Kansas City. The plant, which is fully-owned by Archaea, is located next to a large, privately-owned landfill.

Renewable energy. In 2023, renewable sources accounted for 14% of Missouri's total in-state electricity net generation from both utility-scale (1 megawatt or larger capacity) and small-scale installations (less than 1 megawatt capacity). The share of renewable electricity exceeded 10% of the state's total net generation for the first time in 2021.

Sunrise Movement Kansas City has long advocated for a switch to renewable energy as part of a broader clean energy policy. The target of their activism is the Hawthorne coal-fired power plant.

Beat the heat, save money, and protect the environment (KANSAS CITY, Ks) -- Renewable energy sources like the sun, wind, and water are clean, environmentally friendly alternatives to coal generated electricity. Over the years, the Kansas City Board of Public Utilities (BPU) has worked to diversify its energy portfolio reliance on coal and natural gas to become one of the ...

The plan is a roadmap for future environmental policy and aims for the city to be carbon neutral by 2040. Despite opposition from utility companies Spire and Evergy, the plan passed with few changes.
