In terms of the introduction of renewable energy in the electricity sector, the European Union (EU) has been leading the world since the 1990s, and the share of electricity generated in all 28 European countries including the UK exceeded 30% in 2017 and will reach about 38% in 2021, almost equal to the share of electricity generated from fossil ...

These interactive charts show the energy mix of the country. One is presented as a stacked area chart - allowing us to see a full breakdown of the sources of energy in the supply. The line chart shows the percentage of total energy supplied by each source. ... Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern ...

In recent years, attention is focusing on energy from natural sources such as renewable energy. However, solar and wind power are influenced by natural conditions, making it difficult to obtain a stable supply. ... Fuel oil prices were relatively stable for several years, but increased in 2020 and 2021, which impacted the current power rates ...
