

A study was conducted to assess the status of renewable energy in Mazowieckie Voivodeship, Poland. This included the implementation of a SWOT analysis and the subsequent estimation of the region's renewable energy potential [17]. Kamran et al. also used the SWOT analysis technique to study the renewable energy sector in Pakistan [18].

Jaber et al. [11] used the SWOT analytical tool to assess the status and problems in Jordan's renewable energy sector. Agyekum et al. [12] assessed Ghana's nuclear energy agenda using the SWOT analysis method. Kamran et al. [13] used the SWOT analytical tool to evaluate Pakistan's renewable energy sector.

An Assessment of the Renewable Energy Sector of the Philippines through SWOT Analysis Gabriela Monica Gonzales<sup>1,\*</sup> and Stephen Poletti<sup>2</sup> <sup>1</sup>Department of Electrical Engineering, College of Engineering and Agro-Industrial Technology, University of the Philippines Los Baños, College, 4031 Los Baños, Laguna

An analysis of renewable energy technology integration Investments in Malaysia using HOMER Pro. Sustainability, 14 (20) (2022), Article 13684. Crossref View in Scopus Google Scholar [83] N.A. Rashidi, Y.H. Chai, S. Yusup. Biomass energy in Malaysia: current scenario, policies, and implementation challenges.

We disaggregate the SWOT analysis for marine renewable energy technologies in order to create an overview of pros and cons for every dimension and better identify specific hotspots and possible solutions in different fields. ... Pulselli FM, Sannino G and Marchettini N (2018) Disaggregating the SWOT Analysis of Marine Renewable Energies. Front ...

In Malaysia, the continuous growth in energy demand has contributed to a spike in CO<sub>2</sub> emissions because more than 90% of electricity production comes from fossil fuel-based supplies [9, 10]. The increased use of renewable energy to replace fossil fuels decreases harmful environmental and ecological effects due to emission control, greenhouse gas and fossil fuel ...

The SWOT analysis of the renewable energy sector of Pakistan was accompanied by answering the following questions through the detailed survey of the working papers, national energy reports and statistics, newspaper articles, academics journals [36], TV news, reports, books, unstructured interviews, and the electronic materials. ...

TL;DR: In this paper, a SWOT analysis of solar energy source presents the state of the art, potential and future prospects for development of renewable energy in Romania, concluding that the development of the solar energy sector in Romania depends largely on: viability of legislative framework on renewable energy sources, increased subsidies for solar ...

SWOT analysis of renewable energy in Poland on the example of Pomorskie Voivodeship has been described. The current state of and development prospects for renewable energy in the Pomorskie Voivodeship have been presented. In this region, there are 40 wind installations of total power of 424 MW, 108 hydropower plants of total power of 34 MW, one ...

SWOT analysis provides a powerful means for leveraging an organization's strengths, improving weaknesses, minimizing threats, and taking the greatest possible advantage of opportunities. The SWOT Analysis example here shows the SWOT of company that wants to enter the renewable energy market. As a new entrant, SWOT analysis helps the company:

A SWOT analysis for the wind power sector in Poland was presented in the paper [49]. ... Renewable energy in eastern Asia: renewable energy policy review and comparative SWOT analyse for promoting renewable energy in Japan, South Korea, and Taiwan. *Energy Policy*, 74 (2014), pp. 319-329. [View PDF](#) [View article](#) [View in Scopus](#) [Google Scholar](#)

Through the SWOT analysis, this paper identifies a capacity for additional renewable energy deployment in these countries and highlights the necessity of increased cooperation between the three countries to strengthen their domestic and regional renewable energy sectors and compete in the global renewable energy market in the post-Fukushima era.

Rwanda faces energy shortage, despite having ample energy resources potential. Developing renewable energy (RE) could meet the country's energy needs to achieve sustainable development. This study adopts a Strengths, Weaknesses, Opportunities and Threats (SWOT) analysis and Interpretive Structural Modeling (ISM) to evaluate strategies for the development ...

Renewable energy (RE) plays an increasingly important role in the economy of almost every country in the world. In order to examine the state of renewable energy (RE) in ... Igliński et al. (2016) describes wind energy in detail. SWOT analysis is presented, but only for wind energy. Gnatowska and Moryś-Kucharczyk were also mainly involved in

environmental (PESTEL) analysis, and the SWOT analysis have been considered to analyze the current impact that renewable energy has had in Togo and to illustrate the issues facing the country as well as provide recommendations on the best way to move forward. To develop this further, our research is focused

The advancement put forward to improve the performance of Solar energy has made it to be one of the potential alternative energy sources in the years ahead. This paper, therefore, assesses ...

The SWOT analysis, based on the data panel regarding the twenty largest economies, allows for an examination of the roles of both private and state investment in each energy source, considering opportunities arising from technological and price changes, as well as the extensive renewable and non-renewable energy

potential of the country.

PESTEL analysis. PESTEL analysis is used to identify the strength, weaknesses opportunities, and threats. It looks at external factors and is primary used for market research. ...

To conduct a SWOT analysis for energy companies, you need to gather relevant information from various sources, such as market research, industry reports, customer feedback, competitor analysis ...

The renewable energy sector in India has witnessed remarkable growth and presents immense opportunities for foreign investors seeking to participate in the country's clean energy transition.

The renewable energy implementation in various Island countries can be justified using SWOT analysis, where the strength of these countries are the increasing demand for the energy, dependence on the imported fossil fuel, long ...

The evolution of the energy sector worldwide has rised the concern both in environmental issues and in finding alternative renewable energy sources. With a geographical location suitable for use and technological potential and in renewable electricity generation, Romania is considered to be highly attractive for the green energy market. This document is a SWOT analysis in the field of ...

Consequently, the local market is ready for exploiting renewable energy sources for various applications in different sectors of the economy. According to the conducted SWOT analysis of the RE market in Jordan, there are good opportunities and potentials which need to be further developed.

Determination of optimal renewable energy growth strategies using SWOT analysis, hybrid MCDM methods, and game theory: A case study. Khalid Almutairi ... (ARAS-Grey) method was then used. Using the game theory and fuzzy Shapley value, the best combination of renewable energy development strategies was determined to be ...

This article explores the viability of renewable energy using the strengths, weaknesses, opportunities and threats (SWOT) analysis approach on the key renewable potential in the country. The result indicates that geographic position, political and economic stability and policy implementation are some of the strengths.

Further, the SWOT analysis has been employed to evaluate and formulate policy advice regarding the improvement of the RE system and deployment of renewable energy sources in Jordan (Jaber, Elkarmi, Alasis, & Kostas, 2015). It is identified that the SWOT analysis is a very reliable and important tool for analyzing any complex decision problem. 2.2.

Employing a SWOT analysis in assessing the company's operations enables the adoption of a long-term perspective, placing the business within a comprehensive lifecycle framework. 1. Green Strengths. A SWOT analysis helps identify the company's internal strengths that can be leveraged to facilitate the green transition.

This study applies a SWOT analysis framework for a comparative analysis of renewable energy policies in Japan, South Korea, and Taiwan. The framework of SWOT was originally invented for business and marketing analysis and has been broadly adopted in other research fields including energy management (Terrados et al., 2007).

energy and development financiers such as the World Bank, the African Development Bank, AfDB, government agencies, academics, and other stakeholders in the energy sector. II. Advantages and Challenges of Renewable Energy Technologies 1. Advantages of Renewable Energy Technologies (i) Renewable energy is becoming cheaper: Conventional sources of energy ...
