

A residential solar system can reduce utility costs for water heating by up to 70%. Both direct and indirect booster tanks are available for use in almost any solar water heating system.

Direct systems circulate water through solar collectors where it is heated by the sun. The heated water is then stored in a tank, sent to a tankless water heater, or used directly. These systems ...

Solar hot water systems typically consist of solar collectors, a storage tank, and sometimes a pump and controller. The basic principle is simple--solar collectors absorb heat from the sun and transfer it to water, ...
