Wear-resisting rubber boasts greater durability due to its toughness and rubber-abrasion resistance. It is often used for classic tennis shoe outsoles. Environmental rubber, as its name suggests, is made from recyclable material. The rubber sole of this kind has 10 percent or more of recovered rubber. Air rubber provides increased shock ...

Rubber Pros: A good rubber sole is virtually indestructible (not really but close). Due to the nature of rubber and what it is intended for, you can really go hard on it and it will last. I put so many miles on cobblestones on my Stefano Bemer chukka boots and while I rarely wear them now, am still going on the first sole after 8 years (I must have put hundreds of miles on them ...

The Reltex Cup sole is slightly different from most in the market in that its made from 100% natural latex where other, albeit cheaper, cup soles are made from manmade rubber and/or polyurethane. The "Lactae Hevea" natural latex combines the unsurpassed qualities of extreme comfort and durability, two qualities rarely achieved in one sole.

The Boston Rubber Shoe Company became the largest employer in Melrose and was largely responsible for the transformation of the city from a farming community to one with an industrial-residential character, as farms were sold and developed into housing lots for factory workers. The company was acquired in 1899 (5 years before Elisha's death ...

In addition, some shoes were made with wooden soles, which allowed for footwear with hard soles (turnshoes could only be made with soft ones). This mainly took the form of pattens, and were effectively wooden slippers. [A]t least a few pattens were made with thin, flat wooden soles supported on iron braces instead of wooden arches ...
