

## Safran power systems

Who is Safran electrical & power partnering with?

Last week, Safran Electrical & Power announced a partnership with AURA AERO, a startup created in 2018 that develops fixed-wing electric aircraft. Safran has agreed to supply propulsion systems for two of AERO's new aircraft.

Why should you choose Safran electrical & power?

This combination enables it to provide optimized, innovative and made-to-measure solutions for every client. Safran Electrical & Power currently has unique leverage when it comes to meeting the challenges of safety and increased mass on aircraft.

What is Safran electrical & power doing with Ara Aero?

Safran Electrical & Power is partnering with AURA AERO to conduct studies of the electrical architecture needed for AERO's 19-seat electric regional aircraft (ERA) pictured above. (Photo courtesy of AURA AERO)

When will Safran's Geneus electric motor be available?

Safran's smart ENGINEUS electric motor will be integrated into the two-seat Integral E light aircraft from AERO, which will also feature the GENEUSGRID electric distribution and protection system. The Integral E pilot training aircraft could take flight for the first time this year, and first deliveries are expected to commence in 2023.

Where can I find more information about Safran - equipment?

What services does Safran offer?

Safran provides maintenance, repair, and overhaul (MRO) services tailored to the quality, cost, and turnaround requirements in a highly competitive market. Additionally, the Group offers test cell engineering for aero-engines and other engineering services for the U.S. aerospace industry.

FADEC International's full-authority digital electronic control (FADEC) systems are developed by Safran (Safran Electronics & Defense), jointly with BAE Systems, within the FADEC International 50/50 joint venture. The control unit on the Airbus A400M is adapted to the specific requirements of the high-power propeller turboprop. [Learn more](#)
