

Saltwater aquarium backup power supply

Why do I need a battery backup for my Aquarium?

UPS vs. DC battery backup! A battery back-up can be used to keep your pumps and/or powerheads running inside your aquarium during a power outage. This ensures the water stays oxygenated keeping your fish and other water breathing animals alive through the power failure. During a power outage, your filtration and pumps stop working.

What is the best backup solution for my saltwater aquarium?

If you own a Vortech pump like me, this could be the best backup solution for your saltwater aquarium. EcoTech marine offers battery backup for an aquarium which can provide up to 30 hours of backup power for your Vortech pump. The system comes with a trickle charger and will ensure you are ready for any situation.

How do I supply battery power to an aquarium?

To supply battery power to an aquarium there are systems made by aquarium equipment manufacturers to run their brand of pump or filter. You can run off a UPS, an inverter plugged into a car battery or create a DIY battery powered-system tailored to your aquarium setup.

How many powerheads does an aquarium battery backup system run?

Aquarium battery backup systems typically run one or two powerheads. Systems with larger capacity can run DC-powered return pumps, or heaters and lights if designed large enough. The main benefit to battery systems is to automatically keep a pump or two running during outages of a few hours.

How long does an aquarium battery backup system last?

Aquarium battery backup systems on average will run between 8-48 hours depending on the system installed and the equipment it powers. Powering just a single pump will run twice as long as running two pumps. $\text{Run Time} = \text{Battery Capacity} / \text{Amps drawn by the equipment}$.

How do I Keep my aquarium tank safe from power outages?

Among the several threats that homeowners and companies face during these times are prolonged power outages. Make sure to keep your aquarium tank safe from power outages by installing one of the following five aquarium battery back-ups. This page may contain affiliate links, which will earn us a commission.

EcoTech Marine offers battery backup for an aquarium which can provide up to 30 hours of backup power for your Vortech pump. The system comes with a trickle charger and will ensure you are ready for any situation.
