

Amin H. Nasser, Aramco President and CEO, added: "The Ministry of Energy, led by HRH Abdulaziz bin Salman, Minister of Energy of Saudi Arabia, has enabled a business-friendly investment environment for strategic initiatives and programs, including advancing our work on the Jafurah gas field, which will play an important role in the expansion ...

We believe carbon capture, utilization, and storage (CCUS) will play a role in global efforts to reduce greenhouse gas (GHG) emissions, while ensuring the world can continue to thrive.

Hawiyah. We are expanding the gas processing capacity of our Hawiyah gas plant by more than 1 BSCFD. The new gas processing facilities, expected to be on stream in 2022, are anticipated to raise total production capacity of the plant to approximately 3.6 BSCFD, making it one of the largest gas processing facilities in the world.

Aramco's work to build CCS infrastructure is complemented by its majority-owned subsidiary SABIC (Saudi Basic Industries Corporation), which operates a carbon capture and utilization plant in ...

"With this fund, we are stepping up to address the challenges in pursuit of lower carbon emissions and energy intensity. This fund is meant to increase the initiatives in carbon capture," Al-Muntasheri said. "It is going to drive the advancements in renewable energy and carbon storage solutions." Aramco's green technology

19 years of energy efficiency. Saudi Aramco's energy management program began in 2000. The program has resulted in cumulative energy savings to date of 227,000 barrels per day (bpd) of oil equivalent, which equates to 25.8 million metric tons of carbon dioxide (CO<sub>2</sub>) -- the equivalent of 19% of the Kingdom's commitment to emission reduction by ...

Saudi Aramco signed a joint development agreement with SLB and Linde to establish a carbon capture and storage hub which will potentially be able to safely store up to ...

Aramco Asia overview Serving Saudi Aramco's initiatives in Asia-Pacific region. ... the use of solar and wind energy and the sequestering and storage of carbon dioxide for use in improving oil extraction and the transition from liquid fuel to gas and the promotion of research and development in the field of clean energy," he told other ...

The report praised Saudi Arabia's initiatives, such as the Voluntary Carbon Market, which incentivizes emission reduction activities. ... Utilization, and Storage (CCUS). By 2027, Saudi Arabia could lead the world in CCUS with the opening of the largest carbon capture hub in Jubail, a joint project between Saudi Aramco and the Ministry of Energy.

It follows the signing of a Memorandum of Understanding between Aramco and PIF earlier this year, to participate in a regional voluntary carbon market to be launched in Saudi Arabia in 2023. Aramco Chairman, H.E. Yasir O. Al-Rumayyan, said: "Climate change is a critical issue, which is why sustainability is well-integrated in Aramco's ...

The new initiatives announced during GAIN are part of Aramco's broader strategy to adopt cutting-edge digital solutions across its business, building on its launch of the Saudi Accelerated ...

Within this context, this analysis intends to: (1) explore the ongoing energy transition in Saudi Arabia; (2) examine the role of renewable energy in achieving the sustainability goals in Saudi ...

Saudi Aramco announced today that it is joining the World Bank Initiative: "Zero Routine Flaring by 2030". Flaring remained at less than 1% of Aramco's total raw gas production in the first ...

Aramco Asia overview Serving Saudi Aramco's initiatives in Asia-Pacific ... Aramco Sino Company Limited. Sinopec SenMei, with headquarters in Fuzhou, is mainly engaged in the wholesale, retail, storage, throughput and transport of the processed oil, lubricant and other petroleum products, operation of convenience stores of service stations ...

In addition, and as a result of Saudi Aramco's reservoir management best practices, flaring minimization and energy efficiency programs, the Company's 2018 upstream carbon intensity figure is among the lowest globally at 10.2 kilograms of CO<sub>2</sub> equivalent per barrel of oil equivalent.

Aramco technology presentations included the Smart Loading Optimizer Engine or SLOpE model developed in-house by Aramco experts, as well as the CO<sub>2</sub> sequestration and storage initiative of Jubail CCUS Hub, the Golden H<sub>2</sub> Plasma Unit effort, and the Aramco Metabrain AI project, among several advanced initiatives.

Aramco Asia Overview Serving Saudi Aramco's initiatives in Asia-Pacific region; Our presence in Korea A growing force in the Korean energy services market. Our presence in Korea; Where we're going; ... Bio Energy Carbon Capture and Storage (BECCS) uses CCS technology to extract and store CO<sub>2</sub> from biomass, ...

The European arm of Saudi Aramco Energy Ventures (SAEV) ... Bio Energy Carbon Capture and Storage technologies extract and store CO<sub>2</sub> from biomass, itself a renewable energy source; Finally, nature can act as a natural carbon sink. ... Aramco's initiative to protect, plant and restore millions of mangrove trees inside and outside the Kingdom ...

Investors including oil giant Saudi Aramco and technology giant Microsoft have thrown their weight behind a California start-up that wants to help industry slash its emissions ...

## Saudi aramco s energy storage initiatives

The European arm of Saudi Aramco Energy Ventures (SAEV) ... Bio Energy Carbon Capture and Storage technologies capture CO<sub>2</sub> from bioenergy plants and store it underground; ... Aramco's initiative to plant and restore millions of mangrove trees inside and outside the Kingdom aims to absorb carbon and enhance biodiversity, while also ...

Decades of Reliable Energy Leadership Aramco has been a leading global energy provider for over 9 decades Known for its reliable delivery and efficient management of Saudi Arabia's resources. As the world's largest integrated energy and chemicals company, Aramco is at the forefront of low-carbon innovation. Driving technology and collaboration to address global ...

Kingdom of Saudi Arabia's aim to reach net-zero emissions by 2060, announced as part of the Saudi Green Initiative (SGI). The corporate strategy is built around four strategic themes: Upstream pre-eminence Downstream integration Low carbon Localization and national champions We recognize that a successful energy transition will
