

Sega master system power supply

First you're saying your 32X "KILLED" your Genesis (in another thread), now you're telling someone "AAAAAGH! DO NOT!!!!" use a Genesis 1 power supply on the Master System. The world of Sega consoles ain't that dangerous, and I wouldn't have bloody well told him to use that PSU if I didn't know for certain that it was OK.

The SEGA Power Base Converter Model #1620. While there was only one version made, it is technically another version of the SEGA Master System, but due to the fact that it requires the SEGA Genesis I thought it needed its own page.. It fits and sits beautifully on the original SEGA Genesis, and adds the nice Master System color scheme to it.

Pre 1990 SEGA had sold the US rights for the Master System to Tonka but come the turn of the decade they bought them back and released the "SEGA Master System II". Hoping to save a dime on their re-acquisition, SEGA took the original Master System and removed everything they thought few people ever used and the cost reduced Master System II was ...

Works for with SEGA GENESIS 1, Sega CD 1, Sega CD 2, Sega Master System, and Nintendo NES ... It says, "Sega Genesis 1 AC Adapter Power Supply" by Sega of America, Inc. This adaptor is a knockoff that looks like it came from a back alley electronics store. Don't buy unless you don't mind getting a knockoff.

There is nothing worse than having to find the old, outdated and non-standard heavy power supplies for every single retro console, with almost every console using a different power supply. Standardise and modernise your collection by upgrading your console to USB-C power. The Master System 2 CleanPower upgrade requires soldering.
