Look inside your phone and you'll most likely find a Lithium Ion cell. Shorai Inc use LiFePo4 - Lithium Iron phosphate - in its LFX powersport range of batteries, which is a safer chemistry, with a longer life and a greater ability to dump large amounts of current in one go (ideal for power-hungry starter motors).

Shorai LFX18A1-BS12 Lithium Battery * Length 5.83"; * Width 2.63"; * Height 4.13"; * Weight 2.31 lbs / 1.05 kg * Cold cranking amps: 270 [-+] Shorai LFX batteries come in a variety of case shapes and sizes, capacity options, and right/left polarity options, for the best possible fitment. Typical lithium-ion batteries used in consumer electronics use lithium cobalt oxide (LiCoO₂) cathodes, while Shorai batteries use lithium iron phosphate (LiFePO₄, also called LFP). The short answer is a lithium-ion battery has higher performance, but lithium-iron batteries are less sensitive to temperature extremes.

The Shorai LFX lithium-iron battery in my trusty R1 (trusty mostly because of the battery) first took up residence there in early 2010, when I toiled at a competing publication. At the time, Shorai was a new player in the battery business, had some teething problems, and walked back its claim that its batteries could last ten years (mostly ...
