

Our commitment to excellence, shaping with strong sustainable development of enterprises. We brought together the global industry experts, joint scientific research Institute, together with the customer, developed the world's leading energy storage system. We used Internet platforms and large data storage, the pursuit of a perfect service.

In order to strengthen technical reserves and lay out the entire lithium battery industry chain, on November 10, Shuangdeng signed a strategic cooperation agreement with the Guangzhou Institute of Energy Research, Chinese Academy of Sciences, and reached a technical cooperation agreement on the topic of "new energy material recycling", Chief scientist of Guangzhou ...

Adopting lithium battery technology effectively reduces carbon emissions and energy consumption, achieving environmental sustainability goals for data centers. Low Carbon Environmental Protection: Reduce greenhouse gas emissions and practice green environmental protection concepts.

Not only are lithium-ion batteries widely used for consumer electronics and electric vehicles, but they also account for over 80% of the more than 190 gigawatt-hours (GWh) of battery energy storage deployed globally through 2023. However, energy storage for a 100% renewable grid brings in many new challenges that cannot be met by existing battery technologies alone.

Battery storage manufacturers are numerous on a global scale, with Chinese companies such as CATL and BYD occupying pivotal positions in the global market. Through continuous innovation and technological advancements, these companies have made significant contributions to the development of the global energy storage sector. Notably, Rader Energy is ...

6-GFMHR series of high-rate valve-regulated sealed lead-acid battery is a 12V series lead-acid battery specially developed by Shuangdeng Group using the advanced technology for the data center, UPS and power systems. The product adopts special corrosion resistant alloy, thin plate design, proprietary additive and combined labyrinth column sealing technology.

Jiangsu Front New Energy Co., Ltd was founded in 2006, is a high-tech enterprise with independent intellectual property rights and core technology, and engaged in lithium ion battery and its system research, development, design, production and management.
