

Simplisafe solar panel not charging

Do solar panels work?

The solar panels work perfectly as described. The key is to have the batteries fully charged before relying on the solar panel to trickle charge them. The solar panel does not act like a wall charger, it only maintains an already full battery. Pro tip: You can use one solar panel for two outdoor cameras if you get a mini-USB splitter.

Does SimpliSafe offer a solar panel?

SimpliSafe will sell an optional solar panel to keep the battery topped-up later this fall. The passage discusses the features of SimpliSafe's outdoor camera, including its 1080p resolution, HDR, 140-degree field of view, and "night vision" at a distance up to 10 feet with an LED spotlight. However, it does not mention a solar panel for the camera itself.

How do I charge my SimpliSafe outdoor camera?

Weather-resistant design - Winter and rainstorm ready and is designed to charge the camera in 32°F to 120°F. Designed to maintain your SimpliSafe Outdoor Camera's IP65 rating. Simple set up - Just mount the solar panel and plug the charging cable into the outdoor camera.
