It's Sol. It's a common alternate name for our star system and has been used in Trek. Reply. Pat says. February 8, 2021 at 3:26 pm. Sol system. The Greek word for sun. Follow the bold line and look for the team Terran and Vulcan sectors. Sol is on the 4 corners there. Reply. Tonyp says.

Mercury, also known as Sol I, was the first planet of the Sol system. In the late 19th century, the orbit of Mercury was depicted on a German map of the inner system. (Star Trek: Enterprise opening credits) In 2024, the position and orbital path of Mercury were depicted on a map of the Solar System, which was seen at the gala held for the Europa Mission astronauts. (PIC: "Two ...

The Vulcan system, also known as the 40 Eridani system, was an inhabited star system located in the Alpha Quadrant. This was a trinary star system. Several planets, including Delta Vega and Ni'Var, orbited the star 40 Eridani A. Neighboring the Andorian system, it was located sixteen light years from the Sol system. (ENT: "The Andorian Incident", "Home", "Daedalus"; Star Trek; ...

Starbase 1 was a Federation Starbase 1-type space station administered by Starfleet. Located in the Sol system, it was considered to be one of Starfleet's oldest and most venerable installations. (SNW: "Spock Amok") The location of the base was labeled on a stellar cartography chart seen on the USS Enterprise's ready room viewscreen. (SNW: "Strange New Worlds", "Spock ...

Venus (also known as Sol II) was the inhabited second planet of the Sol system. In the late 19th century, the orbital path of Venus was depicted on a German map of the inner system. (Star Trek: Enterprise opening credits) In 2024, the position and orbital path of Venus were depicted on a map of the Solar System, which was seen at the gala held for the Europa Mission astronauts. ...

Figure 2: Looking at Romulus from the surface of Remus. Judging from the appearance of Romulus, the two orbits must be very close. Credit: Memory Alpha. Another example from Star Trek is the Delos System. The Enterprise D went there in The Next Generation episode "Symbiosis" to chart solar activity of the primary star. The two inhabited planets are Ornara ...

For each site, we provide a screenshot map from Moon Trek showing the flyover path marked in yellow and a red X marking the landing site. We also ...

Starbase 1 is a Federation starbase located in the Sol System in 2256. It is located 100 au from Earth. "Defense of Starbase One": Starbase 1 is attacked by Klingon forces. "Downfall": Starbase 1 is attacked by Klingon forces led by J'Ula. The exact location of Starbase 1 is not established on-screen. It orbits a planetoid with a moon and is even shown to be far out in the solar system ...

I finished the tutorial, rescued the colonists and fought off the Borg, then was ordered to Earth spacedock to meet with the Admiral there. I used the navigation 'M' and double-clicked the Sol system so I'm at the right place but I haven't seen any way to actually enter the system from the sector map. No flag, window or anything asking if I want to enter.

Sol (aka The Sun or Helios) is the common name for the star that formed the Sol system, where the planet Earth is located. It is a main sequence star of the spectral class G2V with an age of circa 4.5 billion years and will at least shine for another five billion years. The Sun (Sol) is the star at the center of the Solar System. The Earth and ...

Sector 001, also known as the Sol Sector or the Terran sector, was a region of space in the Alpha and Beta Quadrants. This was the central sector of the United Federation of Planets in which the Sol system was located. It bordered the Omicron, Yadalla, Antares, Vulcan, and Muratas sectors. (TNG: 'Conspiracy', 'The Best of Both Worlds'; DS9: 'Emissary'; VOY: 'Hope and Fear', ...

This is the tool to create planets and solar systems for role playing games set in Science Fiction. It is designed to help masters of games like Traveller, Starfinder, Stars Without Number, Ultramodern5, Eclipse Phase, Dune Adventures, Star Trek Adventures, Alien RPG, Warhammer 40.000 or Star Wars RPG among others.

A star system, also known as a solar system, a planetary system, or simply as a system, was the area around a star or a group of stars that contains all of the planets, moons, asteroids, nebulae, and other landmarks which are held in place by the star's gravity well. ... (Star Trek: The Motion Picture; DS9: 'By Inferno's Light') In 2254, Spock ...

Sol or the Sun is a yellow dwarf star with an associated star system. Located in the Alpha Quadrant on the Beta Quadrant border, Sol is orbited with a system of several planets and ...

Sol system. Sol, commonly known within the Sol system as the Sun, [6] drew its name from the Latin word for sun, sol, as well as the Roman sun god, Sol Invictus. [7] Sol was orbited by eight (or nine) planets--the dwarf planet Pluto ...

Jupiter Station is a Federation starbase located in orbit of Jupiter, the Sol System. In the 24th Century, it housed the holographic labs of Lewis Zimmerman where the Emergency Medical Hologram was developed. By the 25th century, it houses medical facilities and a baseball team. In 2411, Jupiter Station was under command of Commander Temuk. "Iuppiter Iratus": The player ...

Earth (or Sol III) is the third planet of the Sol system. Earth is the home world of humanity and the seat of the government of the United Federation of Planets. Surface Bozeman, Montana: only during First Contact Day Starfleet Academy: player duty officer recruitment Starfleet Headquarters: only via "Vorgon Conclusions" Orbit Aenigma Nebula: access to captains table ...

Sol, commonly known within the Sol system as the Sun, drew its name from the Latin word for sun, sol, as well as the Roman sun god, Sol Invictus. Sol was orbited by eight (or nine) planets--the dwarf planet Pluto (Sol IX) was sometimes listed as a planet. Mars (Sol IV) was terraformed from Class K to Class M. The Talosians viewed an image of the Sol system and ...
