Polysilicon is the key base material for the solar PV supply chain, while wafers (thin slices of semiconductors) are used to make integrated circuits in solar cells. According to Aditya Lolla, China's battery manufacturing capacity in 2022 was 0.9 terawatt-hours, which is roughly 77% of the global share.

China is a global manufacturing powerhouse, making vast quantities of products at competitive prices. Some battery buyers are worried that Chinese manufacturers might prioritise speed and cost-efficiency over attention to detail. Six of the world's ten largest lithium-ion battery companies are in China.

We are in the midst of a year-long acceleration in the decline of battery cell prices, a trend that is reminiscent of recent solar cell price reductions. Since last summer, lithium battery cell pricing has plummeted by approximately 50%, according to Contemporary Amperex Technology Co. Limited (CATL), the world's largest battery manufacturer.
