

Solar company closing puc net metering 2015

Will Nevada reopen net metering rates for new solar customers?

New solar business in Nevada all but collapsed after a controversial ruling last year, but a recent decision to restore net-metering rates to new residential customers in the northern part of the state should get the solar market there moving again.

Will NV Energy & SolarCity retain retail rate net metering?

After nearly a year of contentious regulatory proceedings, Nevada utility regulators today unanimously ruled to approve a deal between NV Energy, SolarCity and regulatory staff to allow rooftop solar customers to retain the original retail rate net metering that was eliminated last year in a controversial decision.

What is Nevada doing with rooftop solar and net energy metering?

"That is what Nevada is doing with rooftop solar and net energy metering." The decision comes after utility regulators voted to phase out net metering credits and hike fixed fees on all residential solar customers in December 2015.

Will Nevada restore net-metering reimbursements for new solar customers?

In a draft order approved late last month, the Public Utilities Commission of Nevada voted unanimously to restore retail net-metering reimbursements for new solar customers in NV Energy's Sierra Pacific Power Company service area, up to a cap of 6 megawatts.

Why did Nevada's Solar rate change halt a booming solar market?

The decision comes after utility regulators voted to phase out net metering credits and hike fixed fees on all residential solar customers in December 2015. The rate change undercut the economics of investing in home solar and slowed Nevada's booming rooftop solar market to a halt.

How do you move forward with solar and net energy metering?

"Sometimes the best way to move forward is to take a step back, adjust direction, and restart again," the order states. "That is what Nevada is doing with rooftop solar and net energy metering."

[bc_video account_id="1214147015? player_id="HypJxq3ml" video_id="4689931384001? min_width="480px"] SolarCity it will eliminate more than 550 jobs in Nevada because of a ruling by that state's Public Utilities Commission that will "punish" the rooftop solar industry.. SolarCity said in a news release that the PUC's December decision on net ...

This is called net metering. This payment is determined by the contract the customer signed with the utility. Utilities keep the rates updated in a rate book. A distributed energy resource (DER), also called distributed generation (DG), which includes rooftop solar systems, are usually the way that a customer produces more

The PUC in 2015 controversially closed off Net Energy Metering from accepting any new applicants - but not before some 70,000 customers with solar panels had already joined, according to ...

The AEPS authorized the Pennsylvania Public Utility Commission ["PUC"] to enact regulations to impose "technical and net metering interconnection rules." The PUC promulgated regulations in 2006 and amendments in 2016 that dealt specifically with net metering. That is when the trouble began. David M. Hommrich was the president of a solar ...

Pennsylvania net metering details. In 2004, Governor Ed Rendell signed the Alternative Energy Portfolio Standards Act (AEPS) into law. When it was passed, the AEPS directed the Public Utilities Commission (PUC) to set rules requiring utility companies in Pennsylvania to obtain a certain amount of the energy they purchase from alternative energy sources (like solar) by a ...

This move by the PUC reflects the concern that lawmakers voiced during the 2015 legislative session that the higher rebate rates were essentially subsidizing the rooftop solar industry. The concern over artificially high net-metering rebates is no different than the concern over expensive large-scale solar projects.

Expanded regulations for virtual net metering and recent changes by the Pennsylvania Public Utility Commission (PUC) have removed previous barriers for solar developers and operators. Virtual net metering now allows solar farms to be located away from the user's property, as long as they are within the same utility service area.

But first rooftop solar advocates must convince the Nevada Supreme Court that a referendum to restore net metering to the more economically viable rate structure in place in ...

The Idaho Public Utilities Commission (PUC) approved on Dec. 29, 2023, a shift to a net-billing system instead of compensation based on a kilowatt-hour-for-kilowatt-hour basis for solar system owners. The vote came after years of public, expert and environmental community pushback and is an approval of Idaho Power's own internally determined rate calculation.

The Nevada Public Utilities Commission (PUC) okayed on Tuesday a new rate structure for net metering, reducing the sum paid by NV Energy to customers for the excess power generated by rooftop solar systems. With an unanimous vote the PUC greenlighted the plan, which will also change the flat service rate for
