

Solar energy companies in missouri

Is Missouri a good state for solar energy?

Missouri is a state where solar energy adoption is growing quickly, with residential installations leading the charge. It may lag other states in this regard, but the industry is proving that solar can help you save on your bills and help the environment.

Who should I hire for solar in Missouri?

We look for solar companies with owners who understand that when they sell you a solar system, you expect them to be there for the next 25 years to fix any issues that may arise. Here are the top companies we recommend for solar in Missouri: Purelight Power is the top-rated and largest solar company in Oregon and Iowa.

Is Missouri a good place to install solar?

Missouri homeowners can save up to about \$21,400 over the lifetime of their solar energy system. The state's climate also makes it a great candidate for solar power, with an above-average number of sunny days per year. What's the difference between national and local installers?

How does Missouri pay for solar power?

All Missouri utility companies must provide net-metering programs and compensate residents at retail electricity rates, matching what they would have paid for grid power. Missouri offers additional state-specific incentives for solar adoption.

Does Missouri offer solar incentives?

Missouri offers a range of solar incentives that make transitioning to solar energy environmentally friendly and financially rewarding. The U.S. Federal Solar Investment Tax Credit (ITC) is a 30% federal tax incentive for installing residential solar systems by 2032.
