SOLAR POWER PROJECT Introduction - Solar energy is our earth's primary source of renewable energy. It
is a form of energy radiated by the sun, including light, radio waves, and X rays, although the term usually
refers to the visible light of the sun. As oil prices have gone up and other energy sources remain limited,
nations are increasingly searching for safe, reliable long-term ...

Solar energy is radiant light and heat from the Sun that is harnessed using a range of technologies such as solar
power to generate electricity, solar thermal energy, and solar architecture. It is an essential source of
renewable energy, and its technologies are broadly characterized as either passive solar or active solar
depending on how they capture and ...
