

Industry-leading Solar Training. The clean energy workforce is growing faster than ever before. With over 100,000 students and alumni all over the world, SEI's talent pipeline is preparing the solar workforce of today and into the future.

RE100 Introduction to Renewable Energy is an online course for those who wish to learn the basics of renewable energy - including where it is found, how we can harvest it for use in our homes and how it can help ease pressures on the environment.

Each lesson plan outlines the materials and assignments that need to be completed in order to finish the lesson. Materials include watching lesson presentations, reading textbook chapters, articles, and web pages related to the topic, practice exercises, quizzes, and graded assignments.

Online Solar Training and Renewable Energy Courses - Solar Energy International (SEI) To reset your password, submit your username or your email address below. If we can find you in the database, an email will be sent to your email address, with instructions how to get access again.

Whether you see solar as a fantastic business opportunity, or a technology to combat climate change, or a new career, or as an opportunity to change lives... you share our passion for renewable energy.

RE101: Fundamental Math for Solar Applications. If it has been years since you've had to do any math calculations then this free course is for you! We'll review many of the fundamental math ...
