products range from Solar Panels, Inverters, Rechargeable Batteries, ...

Solar Cycle 25 has begun. During a media event on Tuesday, experts from NASA and the National Oceanic and Atmospheric Administration (NOAA) discussed their analysis and predictions about the new solar cycle - and how the coming upswing in space weather will impact our lives and technology on Earth, as well as astronauts in space.

Before and after information above was provided to Max Energy from an actual client on back-to-back 91-degree days with full sun. Their system was producing 50% more energy after Max Energy cleaned their panels! Talk about stacking credits for winter!!! Services Starting at \$189 (541) 646-7776. Free Estimate.

Predictions of a future maximum's timing and strength are very difficult; predictions vary widely. There was a solar maximum in 2000. In 2006, NASA initially expected a solar maximum in 2010 or 2011, and thought that it could be the strongest since 1958. [4] However, the solar maximum was not declared to have occurred until 2014, and even then was ranked among the weakest ...
