Lightyear says the 54 square feet of solar panels across the top of their car can harvest as much as 45 miles of driving range per day on top of about 390 miles of total battery range (per the ...

Solar panel ca

Why aren't solar-powered cars practical? A typical home needs a solar array covering 500 square feet to produce as much power as the people inside need in a year. Ideally, those panels are placed on a south-facing roof with an optimum tilt of about 30 degrees, give or take a few. A few years ago, we did the math on how many solar panels you need to charge an electric car.
