

Solar panel company pima county

Should you invest in solar panel installation in Tucson?

You may decide to invest in Solar Panel Installation for many reasons. It can be word-of-mouth from your friends or maybe your own logical conclusion after doing some of your own research. Here are a few things to consider when looking into whether solar installation in Tucson, Az. is the right choice for you.

How much does solar cost in Arizona?

Southern Arizona is a terrific climate for solar energy due to our many long days of sunshine. Most of our customers are able to get their total monthly electric payments about 40% less with solar energy. So rather than paying \$250 on average to TEP, they are paying about \$130 per month for their solar and about \$10 per month to TEP.

What services does the solar store offer?

The Solar Store is proud to offer a comprehensive range of electrical services aimed at enhancing the efficiency and safety of your home or business. We're committed to helping you reduce your energy consumption and, ultimately, your utility bills, all without sacrificing functionality.

How much do solar panels save a month?

How much you save every month by installing solar panels depends on your energy usage. Southern Arizona is a terrific climate for solar energy due to our many long days of sunshine. Most of our customers are able to get their total monthly electric payments about 40% less with solar energy.

Can solar panels be installed on a north facing roof?

It is not ideal to install solar panels on a north facing roof due to the reduced sunlight north facing roofs get. If a north facing roof is the only obvious choice, we can show you the difference in performance of panels on your north facing roof vs other directions. With that said, most homes in Tucson, AZ are perfect for solar.

Can the solar store help you harness solar power?

We can help you harness solar power. Most other solar companies in Tucson don't touch solar systems installed by others, but The Solar Store does. So many companies have come in and out of the market over the past two decades, and we can help with solar systems that have been orphaned by companies that are no longer in business.
