

Solar panel mounting kit

What is a solar panel roof mount?

A solar panel roof mount (also called a solar racking mount or solar system mount) will hold your solar panels and system in place. The mounting system is a crucial component because it is responsible for securing and stabilizing the solar panels on your roof without compromising the roof's stability or water tightness.

What is a DIY roof mount solar panel system?

DIY roof mount solar panel systems are solar panel kits designed for installation on rooftops. They make use of your home's rafters to support the weight of the solar array. Shop our selection of DIY roof mount solar panel kits for both grid-tied and off-grid properties. Roof mount systems are the standard choice for most home solar installations due to their convenience and cost-effectiveness.

How do I mount solar panels on a roof?

Simple, lightweight solar PV mounting system for just about any roof. SnapNrack's Ultra Rail is a sleek, lightweight rail solution for mounting solar modules on just about any roof. The entire system is a snap to install utilizing new Ultra Rail Mounts that include snap-in brackets for attaching rail.

Does solar electric supply carry solar panel roof mounts?

Solar Electric Supply carries a complete line of solar panel roof mounts for residential and commercial solar systems. All of the components we carry feature weatherproof aluminum or stainless steel components for corrosion resistance.

Where can I find solar panel mounting kits & hardware?
