

Solar power new hampshire

Are solar panels a good investment in New Hampshire?

Installing solar panels is an investment that can easily pay for itself in time. Still, it can help to lessen the financial impact by taking advantage of federal, state and local incentives. As in most states, the best way to save money with solar panels in New Hampshire is through the federal tax credit.

How much does New Hampshire get from solar for all?

New Hampshire will receive more than \$43 million through the EPA's Solar for All program to bring the benefits of solar to low income households across the state. The U.S. Environmental Protection Agency (EPA) announced that the State of New Hampshire has been selected to receive \$43,510,000 from the Solar for All competitive grant program.

Should New Hampshire use more solar energy?

New Hampshire residents pay nearly double the national average for electricity at 30 cents per kilowatt-hour (kWh). Using more solar energy in New Hampshire will help its residents save on these higher-than-average electricity rates, according to the U.S. Energy Information Administration (EIA).

How many solar installers are there in New Hampshire?

According to the Solar Energy Industries Association, there are 24 solar installers in New Hampshire, among the 65 solar companies operating in the state. With so many options, it's important you take the time to choose the right solar panel company for your home.
