

"Very few countries in the world have been able to truly consolidate a renewable energy industry like Chile," says Marta Alonso, director for South America of Global ...

Our study reveals that South America's energy transition will rely, in decreasing order, on solar photovoltaic, wind, gas as bridging technology, and also on some concentrated ...

Accelerating solar PV can cut energy-related CO 2 emissions by 21 per cent in 2050. With over 50 per cent of installed capacity in 2050, Asia (mostly China) would continue ...
