Designed to operate from -55°C to 125°C Tadiran TLH Series lithium thionyl chloride (LiSOCl<sub>2</sub>) batteries are ideal for low-power applications involving extreme temperatures. TLH Series batteries deliver extremely high voltage (3.6 V) and high energy density (730 Wh/Kg) to support product miniaturization. These long-life cells deliver very low annual self-discharge to extend ...

The TL-2150/T-BP is a 1/2AA 3.6V/1Ah Non-rechargeable Battery features a lithium technology. This high

The AA High Capacity 3.6 Volt Lithium Battery -TL-5903 is a high-performance, long-lasting lithium-thionyl chloride (Li-SOCl<sub>2</sub>) battery designed for demanding applications where reliability and endurance are crucial. ... Known for its exceptional energy density and stable voltage output, this 3.6V battery provides consistent and dependable power ...

The battery marking includes „High Energy Lithium Battery" or „Inorganic Lithium Battery". This is an indication for the electrochemical system, lithium thionyl chloride. The battery's major advantages are: High cell voltage. The battery has an open-circuit voltage of 3.67 V and an operating voltage of 3.60 V, which are considerably

BBM supplies the Israeli made Tadiran TL-2100/P Battery with Axial Leads . This AA size, non rechargeable Lithium Battery, delivers 3.6V/2100mAh of energy and is perfect for any demanding application requiring non rechargeable Lithium AA's. Battery Specifications: Battery Type: Cylindrical Cell Voltage: 3.6 V Capacity : 2

Nearly 50 years ago, Tadiran pioneered the lithium thionyl chloride (LiSOCl<sub>2</sub>) battery for remote wireless applications. As the industry leader, Tadiran is dedicated to delivering ultra-long-life power for many different applications. Don't be fooled by competing LiSOCl<sub>2</sub> batteries that have an annual self-discharge rate of up to 3%.

The Tadiran SL550/S Is A Standard 1/2 AA Size High Temp Lithium Battery. This Battery Is Designed For Low Current Applications, Excelling In High Temperature Applications. OPERATING TEMPERATURE: -55°C To +130°C. MEASURES: 0.56" Diameter X 0.99" High. These Tadiran Batteries Are Known For Their High Energy Density And High Terminal Voltage.
