

Terra gen power

Terra-Gen owns and operates 4 battery energy storage projects throughout California, enough to power 1.5 million homes for approximately 4 hours. Our projects provide safe, clean and reliable energy to the residents, businesses and surrounding communities.

As a leader in the clean energy sector, Terra-Gen is focused on bringing affordable clean energy and meaningful economic growth to communities across the United States. Since 2007, our company has remained committed to improving the communities in which we operate clean energy projects.

SOLAR ENERGY PROJECTS. Since being formed in 2007, Terra-Gen has successfully developed over 5,000 megawatts (MW) of wind, solar and energy storage throughout the United States. Terra-Gen owns and operates a number of large-scale solar energy projects in California.

Terra-Gen has an ownership interest in approximately 3.3 GW and 3,800 MWh of wind, solar and energy storage capacity in operation and construction across 28 renewable power facilities throughout the United States.

Terra-Gen's gross operating portfolio comprises 3.8GW of wind, solar and battery storage projects, including 5.1GWh of energy storage facilities across 30 renewable power sites; Terra-Gen's 12GW+ pipeline includes new windfarm and new solar park to start commercial operations in 2025

Terra-Gen is one of the largest integrated and independent renewable energy power producers in the United States. We are an end-to-end project development, financing and operating company producing quality, utility-scale renewable power across a diverse set of technologies.
