How long does a vanadium flow battery last?

Vanadium flow batteries "have by far the longest lifetimes" of all batteries and are able to perform over 20,000 charge-and-discharge cycles--equivalent to operating for 15-25 years--with minimal performance decline, said Hope Wikoff, an analyst with the US National Renewable Energy Laboratory.

Where do vanadium batteries come from?

There are large vanadium resources in the U.S. At present, 90% of the supply goes into steel manufacture. So, steel-producing regions like China are currently the largest producers of vanadium. In conclusion, Matt acknowledged that Li-ion batteries have proven that energy storage can be profitable, and VFBs have benefitted from the progress.
