

Minister of Energy Sebastian Burduja signing 24 financing contracts for self-consumption solar and storage projects, worth nearly EUR14 million. Image: Ministry of Energy. A 204MW battery energy storage system (BESS) project in Romania can progress after the government said it did not need to go through an environmental impact assessment (EIA).

Vaalco has a 60% working interest in the Venus development in Block P and operates it. The first oil is targeted in mid to late 2026. The company previously disclosed its plans to drill the first development well in early 2024.

Equatorial Guinea has signed a Memorandum of Understanding (MOU) with three companies to build a crude oil and petroleum products storage tank farm on Bioko Island. The Ministry of Mines, Industry ...

While most solar PV systems that are co-located with battery storage have in past been AC-coupled, requiring two separate inverters, one for the solar and one for the battery system, there has since about 2018 been a rise in the number of project developers and designers electing to go DC-coupled.. Reducing the balance of plant equipment and therefore ...

and Energy Geography Equatorial Guinea consists of the mainland territory of Río Muni and the islands of Bioko, where the capital is located, and smaller islands of Corisco, Elobey Chico, ... Guinea has implemented gas utilization projects that include LNG, methanol and CNG. Block R is due to begin natural gas production in 2020 and will support a

Infratec general manager Nick Bibby said that the storage system is "the first of its scale to be built in New Zealand". As reported by Energy-Storage.news, the two companies completed their assessment of the project in late 2021, selecting a site in Huntly, a town in the Waikato District.. They then announced the appointment of key contractors in March of last ...

Our local team is now delivering over 1GW [of] energy storage projects within Australia to enhance grid stability and enable the country's clean energy transition." In December 2023, Origin Energy announced that it is investing \$280m (\$355.76m) to increase its stake in Octopus Energy, a UK-based utility, from 3% to 23%.

The government has contracted US company MAECI Solar, in collaboration with GE Power & Water and Princeton Power Systems, to install a 5MW solar microgrid system on Annobon Island. The microgrid will provide electricity for the island's 5,000 residents using GE's battery-based energy storage system, which is designed to withstand the high temperatures ...

Oneida, a 250MW/1,000MWh battery energy storage system (BESS) project which will mix long-term contracted revenues with merchant risk exposure in Ontario, Canada, has reached financial close. ... This gives the IESO the rights to charge the BESS with surplus energy from the grid at off-peak times, including renewables, and output it during peak ...

Equatorial Guinea announced plans to build two new oil refineries among other energy projects worth \$1 billion, its energy minister was quoted as saying, in a bid to diversify a sector that ...

Pablo Beka Esono, country representative at Somagec GE, talks to TOGY about how the company was able to weather the economic downturn through diversification, Equatorial Guinea's logistics infrastructure and how that can help boost the domestic economy. Somagec is a civil engineering firm concentrating on maritime projects such as port infrastructure.

Equatorial Guinea: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.

Equatorial Guinea is set to construct the first liquefied natural gas (LNG) storage and regasification plant in West Africa, advancing efforts to monetize gas resources through ...

Capacity market (CM) auctions have concluded in Italy and Belgium and battery energy storage system (BESS) projects won the lion's share of new contracts. Eku Energy reaches financial close on 500MWh grid-forming BESS in the Australian Capital Territory. November 6, 2024.

Equatorial Guinea's Ministry of Mines and Hydrocarbons (MMH) has announced the key companies shortlisted for the execution of its landmark projects under its ongoing Year of Investment. At Punta Europa, where most of Equatorial Guinea's gas and energy activities are currently located, the country plans to build a modular refinery, storage tanks and a methanol ...

LONDON (Reuters) - Equatorial Guinea announced plans to build two new oil refineries among other energy projects worth \$1 billion, its energy minister was quoted as saying, in a bid to diversify a sector that provides more than 90% of its foreign revenue.

Equatorial Guinea is set to construct the first liquefied natural gas (LNG) storage and regasification plant in West Africa, advancing efforts to monetise gas resources through ...

Sun Lasso Energy Center plans to build a battery energy storage system in southwest Albuquerque, which would be used to store excess energy. The goal of the project would be to help PNM reach net ...

Times equatorial guinea energy storage project

The first phase was completed in 2021 with the tie-back of the Alen field to the facility, with first gas achieved that same year. The second phase of the expansion project will involve processing gas from the Alba field under new contractual terms while the third phase will bring a new gas field online by processing gas from the Noble Energy-operated Aseng field.

OSLO, April 4, 2024 - Oslo-listed Panoro Energy has reached an agreement with the government of Equatorial Guinea on the key terms and conditions for the award of offshore Block EG-23, the company announced on Thursday. Block EG-23 is located north of Bioko Island and adjacent to the producing Alba gas and condensate field. It covers a surface of approximately 600 square ...

Also in the works is the project to increase the gas storage capacity at the Bioko terminal by constructing 22 storage tanks with a total capacity of 1.2 million cubic metres. ... Equatorial Guinea's energy requirements are currently being met by two main energy sources - hydrocarbon and hydropower, and interestingly, its combined capacity ...
