What happened to Titan solar power?

The solar industry has been a beacon of hope for a sustainable future, but not all companies have been able to withstand the economic pressures. Recently, Titan Solar Power, once a major player in the solar energy market, has declared bankruptcy and is going out of business.

How does a Titan solar panel work?

Titan will have little control over how long this step is going to take! The solar panel's job is to take excess electron energy and turn it into electric power. Silver acts as the conductor to pass electricity on to an inverter. The inverter acts as the brain of your solar system.

Why should you choose Titan solar?

Titan handles all aspects of a solar module installation. We take pride in our work and know that it will stand the test of time. Solar is what we do and what we excel at. As a Titan partner, you can rest assured we are just as committed to ensuring every one of your customers are elated with their decision to go solar.

How does Titan install a solar system?

After permit approval, Titan will contact the property owner to schedule installation. When Titan's install team arrives, they will go over the design plans for final approval before they begin. Once the Titan installation crew wraps up the job, they'll finish by giving the property owner a full Solar 101 on the system.
