Tork energy

TORQ energy gels are formulated to provide a quick and convenient source of energy for cyclists, runners and tri-athletes during intense workouts or competitions. With a blend of carbohydrates, electrolytes, and natural flavours, TORQ gels offer a tasty and efficient way to fuel performance and maintain endurance.

Overview History Definition and relation to other physical quantities Principle of moments Units Special cases and other facts See also External links In physics and mechanics, torque is the rotational analogue of linear force. It is also referred to as the moment of force (also abbreviated to moment). The symbol for torque is typically, the lowercase Greek letter tau. When being referred to as moment of force, it is commonly denoted by M. Just as a linear force is a push or a pull applied to a body, a torque can be thought of as a twist applied to an object with respect to a chosen point; for example, driving a screw uses torque, which is appl...

TORQ: Fast-Delivery 2:1 Maltodextrin:Fructose carbohydrate energy gel with 5 key electrolytes and natural flavours. Light on the stomach and with a very thin consistency for ease of consumption. 30g of carbohydrate per serve makes this better value than most gels on the market. Box of 15. One TORQ gel = 1 TORQ Unit (See TORQ Fuelling System)

Torq energy gel review summary: At 45 g per pack, Torq delivers 113-114 g calories and 28-30 g of carbohydrates, of which about 11 g are from sugars also contains all five electrolytes. The gels are very sweet and on the thicker side of the texture spectrum.
