

The Annual Totals Table (ATT) of the International Merchandise Trade Statistics Section (IMTSS) of the United Nations Statistics Division (UNSD) provides annual totals of imports and exports for all countries beginning with the year 2000 for which such data are available for publication. The ATT addresses the issue that data users are often ...

Oct 18, 2024. Next month's UN World Data Forum in Medellin comes at a critical time for the development of data and statistics and a chance to renew our shared agenda. Last month, global leaders gathered here in New York for the beginning of a new session of the UN General Assembly. A Summit of the Future was held just before to discuss ...

6 &#0183; The Monthly Bulletin of Statistics Online presents current economic and social statistics for more than 200 countries and territories of the world. It contains 12 tables of monthly, quarterly and annual data on a variety of subjects illustrating important economic trends and developments, including population, price indices, transport, and ...

About. UN Datathon 2024 will challenge participants to localize the Sustainable Development Goals (SDGs) at the city level, with a focus on Medell&#237;n, Colombia. Set against the Summit of the Future, the event centers on urban sustainable development, addressing three critical themes: Sustainable Tourism, Urban Waste Management, and Circular ...

The National Accounts Main Aggregates Database presents a series of analytical national accounts tables from 1970 onwards for more than 200 countries and areas of the world. It is the product of a global cooperation effort between the Economic Statistics Branch of the United Nations Statistics Division, international statistical agencies and ...

The global indicator framework for Sustainable Development Goals was developed by the Inter-Agency and Expert Group on SDG Indicators (IAEG-SDGs) and agreed upon at the 48 th session of the United Nations Statistical Commission held in March 2017. The global indicator framework was later adopted by the General Assembly on 6 July 2017 and is ...

The progress chart provides a trend assessment, employing a visual framework of stoplight colours to measure progress towards each target using trend data between the baseline year of 2015 and the most recent year. Among the 169 targets, 138 can be assessed based on both available global data and analysis conducted by custodian agencies, while ...

Using the latest available data and estimates, the report provides a comprehensive assessment of the 2030 Agenda. It aims to serve as a foundational resource with the latest data and evidence for developing

Un

recommendations and solutions to advance progress towards the Sustainable Development Goals. This annual  
SDG Report is prepared by UN DESA ...
