

Are US sanctions affecting Russia's energy sector?

The United States and European Union began imposing significant sanctions on Russia's energy sector in 2014. However, both the legacy and new sanctions have largely left Russia's ability to maintain current upstream production and supply global markets untouched.

Which energy sector entities have been sanctioned?

One of the most notable energy sector entities sanctioned was the Limited Liability Company Arctic LNG 2, the operator of the Arctic LNG 2 project, set to expand Russia's share of the global LNG market and start production in early 2024. The company has not publicly acknowledged this sanction listing.

Which companies have been sanctioned by the United States?

These sanctions included asset freezes and travel bans on sanctioned individuals. Additionally, the United States placed six major companies--Gazprom, Rosneft Oil Company, Novatek, Lukoil, Surgutneftegas, and Transneft--on the Sectoral Sanctions Identifications (SSI) List.

Why did the US stop investing in Russia's energy sector?

By September 2014, Western powers strengthened restrictions on Russia's energy sector, with the United States prohibiting investment in long-term debt and equity of six--and the EU of three--leading Russian energy companies.

What are the sanctions imposed on Russian oil & gas?

Today's Executive Order bans: The importation into the United States of Russian crude oil and certain petroleum products, liquefied natural gas, and coal.

How will sanctions affect the mining & metals sector?

Sanctions on the mining and metals sectors represent a substantial shift in Western policy from the pre-2022 invasion period and affect numerous Russian industries. The financial measures implemented in 2023 enable OFAC to subject any company or individual in the mining and metals sectors to the SDN list.
