

Seasoned power generation company and a long-time customer of Volvo Penta, Aiab Energy is diversifying its portfolio into the field of battery energy storage systems (BESS). In this exciting collaboration, Aiab Energy has chosen Volvo Penta to provide an optimized BESS subsystem for their future BESS solutions. Volvo Penta and Swedish backup power solutions ...

Volvo Penta provides power solutions to a range of industries. Image: Volvo Penta. A senior executive from the power solutions arm of manufacturing firm Volvo Group, Volvo Penta, talked Energy-Storage.news through its recent entry into the BESS market.. As covered here, Volvo Penta launched a battery energy storage system (BESS) sub-system solution in ...

2 days ago; It also underlines Volvo Penta's role in the growing global market for energy infrastructure as an independent supplier of energy-dense battery energy storage (BESS) subsystems.

Volvo Penta's Battery Energy Storage Subsystem (BESS) is designed to store energy and minimize downtime during outages. It's scalable and purpose-built and aim to improve efficiency and ...

Volvo Group has acquired the US battery pack company Proterra out of bankruptcy, while its power solutions arm Volvo Penta is providing its BESS sub-system for EV charging infrastructure solutions. Volvo Group, which mainly provides large vehicles, construction equipment and power solutions across various industries, won an auction for the ...

Together, we will be able to accelerate access and adoption of BESS-related solutions," says Helene Mellquist, President Volvo Penta. "Establishing trust and fostering a strong partnership comes naturally, given the proven track record of the Volvo Group 's technology in emissions reductions, heavy-duty power solutions and aftermarket ...

Recognizing the transformative potential of BESS, Volvo Penta has acquired a minority stake in UtilityInnovation Group (UIG) to enable the development of resilient and reliable BESS solutions. Strengthened recently by UIG's acquisition of Enicity, we are well-prepared to continue our contribution towards a more resilient energy future.

Volvo Penta and leading North American telescopic boom excavator manufacturer Gradall Industries, Inc. are showcasing the latest development in their partnership at CONEXPO this week - an electrified version of the OEM's XL 4100 V highway speed wheeled excavator. The zero-emissions concept machine, named EL41H4, is on display at the Gradall Booth, W41500.

1 day ago; "The investment in UtilityInnovation Group highlights the potential we see in our BESS

Volvo penta bess

subsystems for high energy demand sectors," said Hannes Norrgren, president of Volvo Penta's Industrial Business. Sidney Hinton, CEO of UIG, added: "We are thrilled to deepen our partnership with Volvo Penta.

Volvo Penta and Utility Innovation Group Partner to Support Grids with Battery Energy Storage. Just days after announcing its strategic entry into the battery energy storage (BESS) sector jointly with OEMs, Volvo Penta as a BESS subsystem supplier has unveiled a partnership with Utility Innovation Group (UIG) aimed at US and international markets. The two ...

2 days ago; The exponential demand for data center power and the complexity of grid evolution can be met by UIG's skillset and ability to integrate Volvo Penta's energy-dense and robust BESS subsystems ...

Volvo Penta has acquired a minority stake in UtilityInnovation Group (UIG) to enable the development of resilient and reliable BESS solutions. In the rapidly developing energy sector, ...

Seasoned power generation company and a long-time customer of Volvo Penta, Aiab Energy is diversifying its portfolio into the field of battery energy storage systems (BESS). In this exciting collaboration, Aiab Energy has chosen Volvo Penta to provide an optimized BESS subsystem for their future BESS solutions.

Volvo Penta's strengthens its role as an independent supplier of energy-dense BESS subsystems, with expanded investment in UtilityInnovation to advance resilient utility and decentralized energy solutions globally.

Volvo Penta remains committed to expanding its capabilities as a subsystem supplier and collaborating with BESS manufacturers to increase knowledge and expertise to develop cutting-edge solutions that empower digitalization, enhance grid support, and optimize charging processes.

Volvo Penta is providing its battery energy storage subsystem to BESS manufacturers venturing into charging infrastructure support, exemplified in a recent collaboration with TecnoGen, part of BGG (Bruno Generators Group).. Earlier in 2023, Volvo Penta declared its provision of subsystems for Battery Energy Storage needs, affirming its dedication to being a ...

Aiab Energy, a Swedish backup power solutions company, is diversifying its portfolio to expand into the field of battery energy storage systems (BESS).As a result, Aiab Energy has chosen Volvo Penta, Volvo's marine and industrial engine manufacturing arm, to provide an optimized BESS subsystem for the company's future BESS solutions.

Just days after announcing its strategic entry into the battery energy storage (BESS) sector jointly with OEMs, Volvo Penta as a BESS subsystem supplier has unveiled a ...

Volvo Penta and UIG are co-developing robust and efficient BESS solutions, integrating regulatory expertise from Enicity. Hannes Norrgren, President of Volvo Penta Industrial, emphasizes the acceleration of their

Volvo penta bess

energy sector journey through the UIG partnership. Volvo Penta's engineering capabilities focus on integrating subsystems and ...

The Volvo Penta BESS offer demonstrates high-power output from an energy-dense and small footprint. With its origins in heavy-duty design, and being optimized for tough environmental conditions, the battery system is an excellent option for BESS applications.

The signature attribute in Volvo Penta's modular and scalable BESS subsystem is a high-energy-density and high-power battery system with a favorable C-rating - which ensures quick and substantial charge and discharge, in response to sudden demand. These battery systems are energy and power-optimized to meet business and operational needs.

BESS offers a sustainable and versatile means of storing energy from renewable sources such as solar or wind, enabling more efficient use of these resources and enhancing critical infrastructure. Volvo Penta and Aiab Energy will showcase a BESS prototype equipped with Volvo Penta's subsystem at Eliaden in Norway, from 28-30 May.

1 day ago Have your say. Swedish marine and industrial engine manufacturer Volvo Penta has announced a follow-up investment in UtilityInnovation Group (UIG), an US and Irish company ...

Volvo Penta is expanding its power generation business into battery energy storage systems (BESS) with OEMs. Volvo Penta's modular and scalable solution is intended for integration into manufacturers' BESS applications to accelerate market entry. This represents a step towards the company's road to net-zero ambitions.
