

Each battery is about size of a water heater, and the battery system is mounted on a wall--typically next to your electrical panel inside your garage or outside your home. Sunrun's solar battery storage harnesses solar energy for use when you need it most.

California, go solar with confidence. Upgrade your home with solar panels and battery storage, and get expert installation from America's #1 provider. California residents opt for a rooftop solar system with Sunrun for reliable power that keeps up with your needs.

We utilize cutting-edge solar panels with high-efficiency photovoltaic cells, ensuring maximum energy capture from the sun. Our solar panels are designed for durability, clean aesthetics, and longevity--built to withstand even the harshest weather.

Since our inception in 2007, we've been pioneering ways to harness and store power by removing financial barriers and democratizing access to locally-generated, renewable energy. Today, we're the #1 clean energy provider for solar as a subscription.

How does home battery backup work. Adding a battery to your system will let you keep the lights on, the wifi running, and the food fresh during a power outage. Your battery charges from the excess energy your solar panels produce during the day.

Our solar panels feature high-efficiency photovoltaic cells, ensuring maximum solar energy capture. Each solar panel is crafted for durability, clean aesthetics and energy efficiency--built to withstand the harshest weather conditions. Get a quote.

Solar storage for uninterrupted living. Unlock reliable energy and greater control over your electricity usage with our cutting-edge battery technology. Power your home sustainably and experience a brighter future, day and night.
