

The opportunity is huge, but the nuclear industry will need to overcome its cost and chronic project delays to stay competitive with other forms of power generation. Wood Mackenzie projects nuclear capacity to double in its base case and triple in its net zero scenario by 2050, compared with 383 GW last year.

Lens is Wood Mackenzie's data analytics platform built to deliver insights at key decision points in your end-to-end workflows. Highly intuitive, it is designed for enterprise-wide use. Developed to extend your Lens data access, Lens Direct is our API service that enables you to integrate our data into your proprietary systems and power your ...

Wood Mackenzie's Power & Renewables research and consulting capabilities cover the entire renewables value chain. We can provide you with a depth and breadth of coverage that spans the globe, thanks to the excellence associated with our ...

Originally founded in Edinburgh and also headquartered in Edinburgh, it has over 30 offices worldwide. Originally established as stockbroker in 1923, the company's energy business was launched in 1973, when it started reviewing the North Sea oilfields. Between 2007 and 2014, Wood Mackenzie acquired coal specialists Hill & Associates in the US, Barlow Jonker in Australia, and Brook Hunt, the UK-based metals analysts.

When you choose Wood Mackenzie, you choose a true partner, who brings innovation and clarity with our trusted, independent intelligence. Our global solutions bring you the data, research, and analytics you need to capitalise on the opportunities of the energy transition.

Wood Mackenzie research finds the result to be downgrades in the amount of capacity actually available to the market when it is most needed. PJM's recent capacity market auction is a perfect example of how these accreditation rules are impacting markets: capacity prices were nearly 10 times higher than the previous auction.

About Wood Mackenzie Power & Renewables Wood Mackenzie, a Verisk Analytics business, is a trusted source of commercial intelligence for the world's natural resources sector. We empower clients to make better strategic decisions, providing objective analysis and advice on assets, companies and markets.

The US Solar Market Insight(TM) is also available as a part of Wood Mackenzie's US Utility Solar and US Distributed Solar Services. In addition to this report, the services include access to our analysts, analysis of the competitive landscape, and additional market data and insights.

The report is accompanied by our 2024 Global wind power asset ownership company database. Data includes company, country of origin, region, portfolio focus, cumulative wind power assets in 2018-2023, annual capacity additions in each year, and footprints of wind power assets, as well as parent and subsidiary information.

US Solar Market Insight(TM) is a collaboration between the Solar Energy Industries Association[®] and Wood Mackenzie that brings the most in-depth analysis and forecasts on the solar industry to professionals in the form of quarterly and annual reports.

Wood Mackenzie expects the REC oversupply situation to ease starting from the late 2020s due to state-mandated policies that raise REC purchase requirements from power and non-power industries alike. In Japan, low REC prices (US\$4-5/MWh in 2023 and 2024) are not sufficient to economically support the
